Miami University
Armstrong Student Center
Oxford, OH

Located at the heart of Miami University's historic campus, this dynamic new Student Center serves as a hub of student activity, providing spaces for large events and performances, student organization offices, lounges and study areas, and 24-hour food service. An inviting central atrium space, sited along a major new "interior street", creates the core of the new Center. The project combines renovation of two building with new construction. As part of University goals the project is currently tracking LEED Gold. (Associate Architect: BHDP Architecture Phase I: 150,000 g.s.f.; Phase II: 50,000 g.s.f.)
