Milton Academy  
Pritzker Science Center  
Milton, MA

The new Milton Academy Pritzker Science Center is a 40,000 s.f. building on two floors containing 14 classrooms and 4 inquiry labs, as well as a large project room for independent student science projects. Sited between the Kellner Performing Arts Center and the Head of School's House, the building completes the southern edge of the main campus green. Prominently located off Centre Street on the Campus Green, the new science building celebrates Milton Academy's commitment to making science a highly visible, sustainable, and integral component of its academic mission. (40,000 s.f.)
