Rochester High Falls Parking Garage
Rochester, NY

The High Falls Parking Garage provides space for 750 cars on its seven levels. This garage initiated the city's program for revitalizing the Brown's Race neighborhood, a 19th century industrial area, into a contemporary cultural/commercial/residential district. The area, highlighted by an 80-foot waterfall on the Genesee River, was long cut off from the more active parts of the city, yet the city had its beginning on this site. LaBella Associates is the Associated Architect.

1995 Honor Award, City of Rochester AIA;
1995 Honor Award, New York Chapter, AIA;
1996 Honor Award for Design Excellence, Boston Society of Architects
