Seaside Community Performing Arts Center

Seaside Community Performing Arts Center  
Seaside, FL

A large outdoor performance venue for the renowned Town of Seaside will serve both touring and locally based performance companies on "The Lyceum's" central lawn. "The Performance Porch" provides a first-rate stage for music, theater, lyric opera and film, and includes the construction of adjacent two-story arcades. Future plans include a 300-seat concert hall, a large donor garden, and a variety of structures to house local arts organizations. When constructed, the project will complete the central lawn of the town's arts and educational precinct. The Associated Architect is DAG Architects, Inc.
